EDUCATION

B.E. Computer Science and Engineering, Chennai Institute of Technology

Sept 2023 – May 2027

- CGPA: 9.06 (up to 5th semester)

PROJECTS

Ressist - Research Assistant

- AI-driven Smart Research Assistant that enables users to organize and summarize academic papers using Retrieval-Augmented Generation (RAG) powered by **LangChain** and **Qdrant** for contextual, chatbot-based insights. It features **Supabase** for secure multi-user authentication and session management, **Redis** for session metadata and task queue handling, and a **Golang** backend that orchestrates containerized processing through **Docker**, ensuring fast, isolated, and scalable multi-user workflows.
- Tools Used: Golang, Python, React, Vite, FastAPI, LangChain, Qdrant, Supabase, Redis, Docker, API Integrations

Quiz Generator with AI Prompts and FSD

- Generates quiz questions from user-provided prompts with support for multiplayer sessions, where participants join using a unique code. Ensures real-time interaction and synchronization through WebSocket connections, with live scores and rankings shown after each question. Features a simple and responsive interface for both host and participants.
- Tools Used: TypeScript, React, WebSocket (Multi-User Connection), Node.js (Backend Communication).

AgroIndia - Plant Disease Detection

- Smart Crop Disease Detection and Monitoring System that analyzes uploaded crop images using a **CNN**-based model to identify the crop type and detect diseases with confidence scores and suggested remedies, integrating multiple trained models for major crops like tomato, potato, rice, corn, cotton and wheat. The system achieves **94% accuracy** in disease detection.
- Tools Used: TensorFlow, LLMs(Chatbot Integration), FastAPI(Model Integration), React, Python, and OpenCV.

EXPERIENCE

UI/UX and Full-Stack Developer Intern

12/2025 - 02/2026

Enhanced the company's ERP system by developing web modules using TypeScript and Supabase. Built billing and invoice generation features via REST APIs, improved UI/UX design, and optimized product images to enhance performance and responsiveness. Contributed to database integration and overall system efficiency.

SKILLS & INTERESTS

Languages: Java, C++ , Python, SQL, Bash, JavaScript

Frontend and Design Tools: JavaScript, HTML, CSS, React.js, Vite, Figma, Canva, TailwindCSS, Bootstrap

Backend Tools: Node.js, Express.js, FastAPI, Redis, MongoDB, PostgreSQL, MySQL, RESTful API, Supabase, Postman

Other Tools: Amazon Web Services (AWS), Git, GitHub, Docker, LangChain, RabbitMQ, PyCharm, IntelliJ IDEA

Core Skills: Agile Practices, Object Oriented Programming, Problem-Solving, Clean Code, Teamwork, Fast Learner

ACHIEVEMENTS

- **LeetCode** - knight (Max Rating: 1924) / Solved 690 problems ID: devadhathan
- **CodeChef** - Two Star (Max Rating : 1521) / Solved 180 problems ID: devadhathan
- **Codeforces** - Max Rating : 1066 ID: devadhathan
- **Full Stack Development Hackathon (Finalist):** Served as the frontend developer, building user interfaces, designing responsive and interactive layouts, collaborating with peers, and gained valuable professional connections.
- **L3m0n CTF (2nd Runner-Up):** A Capture the Flag event, gaining hands-on experience with cybersecurity tools such as Ghidra, Nmap, and Wireshark while reverse engineering binaries, analyzing flags, and debugging exploits using Terminal.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** Covers foundational knowledge of the AWS Cloud platform, focusing on cloud concepts
- **Oracle Cloud Infrastructure (OCI) AI Foundations:** Learned ML algorithms and explored fine-tuning of LLMs.
- **Cisco:** Introduction to Cybersecurity / Cybersecurity Essentials / Networking Essentials.

VOLUNTEERING

Organized non-technical events and conducted technical workshops for Takshashila, the annual cultural festival.
